Perspectives

V. Fack, S. Lievens and J. Van der Jeugt
On the diameter of the rotation graph of binary coupling trees 1

L. Volkmann
Cycles in multipartite tournaments: results and problems 19

Contributions

M. Aïder and M. Aouchiche
Distance monotonicity and a new characterization of hypercubes 55

J.D. Berman and G.H. Bordalo
Irreducible elements and uniquely generated algebras 63

J. Błażewicz, P. Formanowicz, M. Kasprzak and D. Kobler
On the recognition of de Bruijn graphs and their induced subgraphs 81

P. Hansen, B. Jaumard and B. Simeone
Polynomial algorithms for nested univariate clustering 93

C. Heuberger
On hamiltonian Toeplitz graphs 107

Y. Ishigami and H. Wang
An extension of a theorem on cycles containing specified independent edges 127

F. Larrión and V. Neumann-Lara
On clique divergent graphs with linear growth 139

J. Leydold
The geometry of regular trees with the Faber–Krahn property 155

G. Li, C. Chen and G. Yu
Orthogonal factorizations of graphs 173

R. Li and R.H. Schelp
Hamiltonicity of $\{K_{1,4}, K_{1,4}+e\}$-free graphs 195

A. Malnič and D. Marušič
Constructing $\frac{1}{2}$-arc-transitive graphs of valency 4 and vertex stabilizer $Z_2 \times Z_2$ 203

S. Ovchinnikov
Well-graded spaces of valued sets 217

Z. Pan and X. Zhu
The circular chromatic number of series-parallel graphs of large odd girth 235

Notes

F.M. Dong, K.L. Teo, K.M. Koh and M.D. Hendy
Non-chordal graphs having integral-root chromatic polynomials II 247

S. Ferneyhough, R. Haas, D. Hanson and G. MacGillivray
Star forests, dominating sets and Ramsey-type problems 255

A. Golemac and T. Vučičić
New (100, 45, 20) symmetric designs and Bush-type Hadamard matrices of order 100 263

M. Harada
Self-dual $\mathbb{Z}_4$-codes and Hadamard matrices 273

D. Rautenbach
A note on Kelly's lemma for infinite sets of integers 279

M.E. Riddle
The minimum forcing number for the torus and hypercube 283

V. Yegnanarayanan
On a question concerning prime distance graphs 293
